

# The CliniBank Study

## Improving future clinical supports for children

At CliniKids, we would like to learn more about which supports work best for particular children and which ingredients are key to successful supports. If you and your family are interested in contributing to research, join our CliniBank study.

### Can my child participate?

Your child is eligible to participate in this study if:

- They are receiving clinical services at CliniKids
- They are aged between 6 months and 5 years
- They have a diagnosis of autism or any other developmental concerns

### What's involved?

- Questionnaires
- Face-to-face play-based assessments here at CliniKids, assessing skills such as communication, social interaction, thinking, and motor skills.

### How can CliniBank benefit you?

- Project staff will provide you feedback following each assessment session.
- CliniKids clinicians can access information collected as part of CliniBank to inform goal setting and decision making related to your child's support program.
