

Mealtimes

“Autism is a lifelong developmental disability that affects how a person communicates with, and relates to, other people. It also affects how they make sense of the world around them.”

National Autistic Society UK. 2014. What is autism?

Mealtimes

Learn about your own mealtime preferences and about the autistic mealtime experience. Learn strategies to support positive mealtimes in school settings and when to involve other professionals to support mealtimes.

What is covered?

- Our own mealtime experience
- Mealtimes in early years and school settings
- Mealtimes and autism
- Mealtime accommodations
- When to refer and to who

Who will deliver the presentation?

The presentation is delivered by an experienced Speech Pathologist, who works with young autistic children at CliniKids, The Kids Research Institute Australia’s clinical team. CliniKids is working to bring research into therapy sessions as soon as possible. CliniKids’ vision is to share with others around the child — educators, parents and the community — the best way to support autistic children to flourish.
